

Be secure with

Gas Secura

Safety device for domestic LPG cylinder.

LPG is used as fuel for cooking food in every household. Though cooking gas is user friendly but in case of leakage it can cause big disaster to your family and property.

Gas Secura is an innovative mechanical device launched for domestic LPG cylinder to avoid accident caused by Gas leakage.

With its special feature of Auto shutoff it prevents the household from accidents. It works on pressure technology.

Gas Secura will automatically shut-off the gas supply from the cylinder due to major leakages caused due to:

- 1.The rupturing of tube or pulling off the stove or regulator.
- 2.The regulator failed to function properly.
- 3.The tube catching fire.

Main features:

- ◆ Auto shutoff facility on Major Leakage
- ◆ Minor leakage testing facility
- ◆ Saves upto 20% of gas*
- ◆ Low Gas Indicator
- ◆ Product liability Insurance of Rs. 5 Crores
- ◆ Easy installation

INSTALLATION

STEP 1

First remove regulator from LPG Cylinder.

STEP 2

Fix The Gas Secura on the LPG Cylinder.

STEP 3

Take the Regulator and Fix it on Gas Secura.

STEP 4

Depress the Gas Secura gauge dial a few second till the needle raises.

HOW TO READ GAS SECURA GAUGE DIAL

GREEN ZONE : If the needle of the Gas Secura dial is in this area adequate gas supply is indicate.

YELLOW ZONE : If the needle of Gas Secura is in this area, low LPG level is indicated.

RED ZONE : If the needle of Gas Secura is in this area, low LPG level is indicated, further to which refilling of the cylinder would be required soon.

FEATURES OF GAS SECURA

Gas Secura will automatically shut-off gas supply from the cylinder due to major leakages of gas caused due to :

- The rupturing of a tube or pulling off the stove or Regulator.
- The regulator failed to function properly.
- The tube catching fire.

Note : PRODUCT LIABILITY INSURANCE COVERED FOR Rs. 500 Lacs.*

Gas Secura will not shut off if :

- Animator leakage occurs (in this case, it refers to instructions covered under the heading-'How to test for minor leaks')
- The controls of an appliances (gas stove) in until condition is / are left in ON positions.
- There is insufficient flow through the spot where the leakage is occurring
- Supply line is too small.
- The gas system is mounted or placed near a corrosive area or an area which is subjected to vibration.

In the most of the cases where hose rapture occurs and if there is insufficient flow due to blockage / restriction, or the supply line diameter(internal diameter) is too small Gas Secura may not be activated.

Automatic shut-off may occur if Gas consumption is excessive at low Cylinder pressure. However, if shut off continuously occurs, it is

CAUTION

- Carry out the minor leak testing each time the LPG is used, particularly when cylinder has been changed / refilled or when connection have been tampered with.
- If Gas Secura continually shuts off the gas supply refer to the section 'Feature of Gas Secura' as mentioned before.
- Never use Gas Secura without the regulator supplied with your gas connection. Also do not mishandle, tamper with the Gas Secura (including gauge) as this will be void warranty and may result in malfunctioning thereby leading to accidents.
- Never use Gas Secura without the regulator as this may bypass the shut off valve mechanism, there-by causing accidents.
- Never depress the Gas Secura gauge dial so much that it allows the Gas to flow out thereby by passing the shut off valve mechanism. This could cause an accident. Only depress the gauge a few time (as mentioned under 'installation'). When the regulator is connected to the Gas Secura device on one end and to the pipe connected to the gas-stove at the other end.

WARRANTY

Thank you for purchasing Gas Secura. Your limited 3 years warranty period commences (as per the terms and conditions our product. To avail the above Said warranties please retain your bill from the Authorized Dealer Stamp on it. The limited Warranty will be void without proper proof of purchase.

Gas Secura guarantees in the event of any Gas Secura components proving defective (other than through misuse or non-compliance with the instruction, procedures, fetures and caution as mentioned in this booklet) in the first 36 months we will, subject to the LIMITATION OF LIABILITY of this warranty, replace the Gas Secura device free of Charge.

Advisable to have the system safety checked immediately by an authorized Gas fitter.

Do not use the system until the problem has been rectified, in such a situation it is also possible that cylinder may need refilling. Shut of is indicate by the Gas Secura when the Dial needle suddenly returns to zero. If shut of occurs the gas stove controls may be Turned OFF position and procedure for 'How to test for minor leaks' should be repeated. If continuous shut off occurs, the LPG system would need to be refilled by an Authorized Gas fitter.

Gas Secura

Safety device for domestic LPG cylinder.

At extreme low temperature and server winter conditions Gas Secura will shut off gas supply and may not function properly

WARNING
